1. CoverSoko — Founding Frontend Developer / UI/UX Designer

Activity type: Computer/Technology
Position: Founding Frontend Developer & UI/UX Designer
Organization: CoverSoko
Grades: 12
When: During the school year
Participation: Mar 2026 – May 2026
Hours/week: 25
Weeks/year: 4 (Not Consecutive weeks)

Description: Co-built an insurtech MVP; led frontend/UI design for insurance quotes & comparisons; platform was later acquired and scaled.

---

2. Independent Software Development Projects

Activity type: Computer/Technology
Position: Full-Stack Developer
Organization: Independent Projects
Grades: 10, 11, 12
When: During the school year
Participation: Feb 2025 – Mar 2026
Hours/week: *24*
Weeks/year: *26-28*

Description: Built real-world apps in Node.js, React & Java, including parking, church attendance, and utility-token systems; used APIs, PostgreSQL & security.

Projects included:

- **Parking Management System:** Feb–May 2025, ~4 months
- **Nyagatare District Seventh Day Attendance System:** Dec 2025–Jan 2026, ~2 months
- **EUCL Token Management:** Jan–Mar 2026, ~3 months

---

3. FIRST LEGO League Robotics

Activity type: Robotics
Position: Team Leader
Organization: FIRST LEGO League / Coderina Rwanda
Grades: 10, 11, 12

When: During the school year
Participation: 3 seasons
Hours/week: 3
Weeks/year: 6

Description: Competed for 3 seasons; led the last 2; built/programmed robots, researched solutions, and presented projects through Rwanda's FLL pathway.

---

4. Yale Entrepreneurial Society (YES) Fellowship — AI/ML Cohort

Activity type: Entrepreneurship
Position: Project Team Leader; Backend Developer & Designer
Organization: Yale Entrepreneurial Society
Grades: 12
When: During the school year
Participation: Feb 7 – Apr 11, 2026
Duration: 8 weeks

Description: Led a 3-person international team in AI/ML cohort; built Path Finder, an AI career platform, as backend developer & designer.

---

5. Science Club — Full-Stack Development Mentor

Activity type: Computer/Technology
Position: Student Instructor / Mentor
Organization: Science Club
Grades: 12
When: During the school year
Participation: 2025–2026
Hours/week: 2
Weeks/year: 39

Description: Taught full-stack web development to S5–S6 students; mentored peers to build and maintain school software and become future project collaborators.

---

6. Debate — Competitions & Club Courses

Activity type: Debate/Speech
Position: Co-Leader; Second Speaker

Organization: i Debate
Grades: 10, 11, 12
When: During the school year
Participation: 3 years
Hours/week: 1.5
Weeks/year: 39

Description: Debated for 3 years; co-led club in S5–S6; served as second speaker; helped teams win district & provincial competitions.

---

7. Wavumbuzi — Competition & Club Weekly Courses

Activity type: Entrepreneurship
Position: Participant
Organization: Wavumbuzi
Grades: 10, 11, 12
When: During the school year
Participation: 3 years
Duration: 6 weeks/year

Description: Completed Wavumbuzi for 3 years; developed and pitched ideas; ranked 11th nationally in 2025 and won a weekly challenge award.

---

8. Heart of Sympathy

Activity type: Community Service (Volunteer)
Position: IT, Data & Monitoring and Evaluation Officer
Organization: Heart of Sympathy
Grades: 12
When: After the school year
Participation: Sep 2026 – present

Description: Support IT systems, data collection, and M&E; help organize digital records, track activities, and measure outcomes across community programs.

---

9. Isomo December Challenge

Activity type: Community Service (Volunteer)
Position: Communications Lead

Organization: Isomo Academy
Grades: 10, 11
When: During school break
Participation: 2024, 2025

Description: Led communications for a 3-person team across 2 challenges; supported 20+ people at Gahini Hospital and a family of 12 using 110K RWF.

---

10. Solar Water Purification — Science Club

Activity type: Science/Research
Position: Student Researcher / Team Member
Organization: Science Club
Grades: 10, 11
When: During the school year
Participation: 2024, 2025
Hours/week: 4
Weeks/year: 3

Description: Helped develop a solar-powered water purification system; applied physics, engineering, and problem-solving to a practical water-access challenge.

---

11. Business & Entrepreneurship Competitions

Activity type: Entrepreneurship
Position: Participant / Pitcher
Organization: Student Entrepreneurship Competitions (NESA/ Educate)
Grades: 11, 12
When: During the school year
Participation: 2025–2026

Description: Developed and pitched business ideas in student competitions; earned 300,000 RWF, a Bronze Medal, and Outstanding recognition at the provincial level.

1. FIRST LEGO League — 4th Place Internationally

Level: International
Grade: 11

Honor: 4th Place Internationally & Rising All-Star Golden LEGO Kit Trophy — FIRST LEGO League

---

2. 2nd Top-Performing Student — National O-Level Examinations on District Level

Level: District
Grade: 9

Honor: 2nd Top-Performing Student — Rwanda National O-Level Examinations

---

2. Academic Excellence Award — 3 Years

Level: School
Grade: 10, 11, 12

Honor: Academic Excellence Award — 1st in Class, 3 consecutive years

---

3. NESA/Student Business Pitch — Bronze Medal + 300,000 RWF

Level: Provincial
Grade: 12

Award: Bronze Medal & Outstanding Award — Provincial Business Pitch Competition; 300,000 RWF Prize

---

4. Debate — 2nd Best Speaker

Level: District
Grade: 12

Honor: 2nd Best Speaker — District Debate Competition; Silver Medal & Certificate of Recognition

---

5. Wavumbuzi — 11th internationally + Weekly Challenge Winner

Level: International
Grade: 11

Honor: 11th Nationally — Wavumbuzi 2025; Weekly Challenge Award Winner

1. AI in STEM — International Ambassador, Rwanda

Activity type: STEM / AI / International Collaboration
Position: International Ambassador of AI in STEM — Rwanda
Organization: AI in STEM
Dates: Feb 2026 – Present
Scope: International

Description:

Represent AI in STEM in Rwanda; organized local sessions and joined curriculum/workshop preparation in Zimbabwe; connected Rwandan AI learners with a global network; contributed to community-focused AI projects.

---

2. AI/ML & Python Instructor — Global Classes

Activity type: Teaching / Computer Science
Position: Python Instructor / Mentor
Organization: AI/ML learning community
Dates: 2026 – Present
Scope: International

Description:

Teach virtual Python classes to students from 25 countries; explain programming concepts, guide projects, and support learners building technical skills across borders.

---

3. FLL & AI Hackathon Coach — National Level Coach

Activity type: Robotics / Coaching
Position: National-Level Coach
Organization: Robotics & AI competitions
Dates: Jan 2026 – Present
Scope: National

Description:

Coach high-school teams in FLL robotics and AI hackathons; mentored students from Nyagatare schools to provincial and national levels, and funded AI opportunities.

---

4. NYAMIRAMA AGRODEALERS — Data Manager

Activity type: Work
Position: Stock Manager
Organization: Nyamiyaga Agrodealers, Byumba, Rwanda
Dates: Oct 2026 – Present
Scope: Local/Regional

Description:

Manage inventory and DATA records for an agricultural business; monitor supplies, perform analysis, and support day-to-day operational decisions.

---

5. John C. Maxwell **iLead — School Coordinator**

Activity type: Community Service / Leadership
Position: School Coordinator
Organization: iLead
Dates: 2025, 2026
Scope: School / Regional

Description:

Coordinated iLead at school; distributed learning resources, connected students with national and regional leaders, and facilitated free courses for peers.

---

6. AI Project Development & Community Problem-Solving

Activity type: Computer Science / AI
Position: AI Project Contributor / Developer
Organization: AI in STEM
Dates: Feb 2026 – Present

Description:

Contributed to AI projects addressing local community problems; collaborated with international learners and helped develop practical solutions through coding and AI.

---

12. Parking Management System

Activity Type: Computer/Technology
Position: Full-Stack Developer
Organization: Independent Project
Grades: 11
Dates: Feb 2025 – May 2025
Duration: ~4 months
Participation: During school year

What it was:
A Node.js-based parking management system designed to make parking allocation more organized and efficient. The system allowed real-time tracking of available parking spaces and was built to communicate with external services through REST APIs.

What I did:

- Designed and developed the system using **Node.js**
- Built real-time parking-slot tracking
- Implemented **RESTful APIs** for communication with external systems
- Designed user interactions around parking allocation
- Worked on making the process more efficient than manual allocation

Common App-style description (150 characters):

Built a Node.js parking system; tracked available slots in real time and integrated REST APIs to streamline parking allocation.

---

13. Nyagatare District Seventh Day Attendance System

Activity Type: Computer/Technology
Position: Full-Stack Developer
Organization: Independent Project
Grades: 11–12
Dates: Dec 2025 – Jan 2026

Duration: ~2 months
Participation: During school break

What it was:
A React-based attendance management application developed for church use in Nyagatare. It replaced a more manual approach to tracking attendance with a digital system backed by PostgreSQL.

What I did:

- Built the application using **React**
- Designed an intuitive interface for church administrators
- Integrated **PostgreSQL** for storing and processing attendance data
- Improved the accuracy of attendance tracking by approximately **40%**
- Optimized data processing and retrieval
- Focused on making the system practical for administrators who needed to manage attendance

Common App-style description (150 characters):

> Built a React attendance system for church use; integrated PostgreSQL and improved attendance tracking accuracy by 40%.
